DETAILED ACTION

Election/Restrictions

1. Claims 1-32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 6/08/2007.
2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
3. Claims 33-92 are still pending in this application.

Priority

4. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

Art Unit: 2875

6. The information disclosure statement filed 2/26/2007 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance (in regards to JP 200-514949), as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Objections

8. Claims 52, 67 and 84 are objected to because of the following informalities: The phrase "in case" on line 2 of the claims need to be omitted. Appropriate correction is required.

9. Claim 58 is objected to because of the following informalities: A word such as "and", "or", or "with" appears to be omitted from line 4 of claim 58 in between the words "light radiating surface" and "a light reflecting surface". Appropriate correction is required.

Allowable Subject Matter

10. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not suggest or disclose the claimed limitations or the combined functions of the claimed invention as a whole.
11. In regards to claim 33, the prior art also does not suggest or disclose a plurality of illuminating devices provided at a present interval on the light incident surface of the light guide plate with each illumination device containing a first, second, and third light source for radiating three different prime colors including a optical means and a color mixing means for each illumination device.
12. In regards to claim 43, the prior art also does not suggest or disclose a plurality of illuminating devices provided at a present interval on the light incident surface of the light guide plate with each illumination device containing a first, second, and third light source for radiating three different prime colors, a first, second and third lens for refracting the light from the first, second and third light sources, further including two triangular prisms and a dichroic prism.
13. In regards to claim 58, the prior art also does not suggest or disclose a plurality of illuminating devices provided at a present interval on the light incident surface of the light guide plate with each illumination device containing a first, second, third, and fourth light source for radiating three different prime colors with one the third prime color duplicated, a first, second, third, and fourth lens for refracting the light from the first, second and third light sources, further including two triangular prisms, two beam splitter prisms and a wavelength plate between the first and second beam splitter prisms.

Art Unit: 2875

14. In regards to claim 73, the prior art also does not suggest or disclose a plurality of illuminating devices provided at a present interval on the light incident surface of the light guide plate with each illumination device containing a first, second, and third light source for radiating three different prime colors with one the third prime color duplicated, a first, second, and third lens for refracting the light from the first, second and third light sources, further including a first reflecting plate, two beam splitter prisms and an optical plate.
